

Year 1 Home Learning- Spring 1

Every **Friday**, your child will be given spellings and maths home learning to be brought back to school the following **Wednesday**.

Your child will be given a book to take home and read on a weekly basis. They will be given a reading record for you to record the sharing of the book with your child. When you have shared with your child at least 3 times, please return the book for it to be changed.

Each term your child will be given a project based on our class topic. This can be completed in your child's own time and shared with the class when brought into school!

Home Learning Project

Our topic this term is **Space Explorers!** We will be learning about the Apollo 11 moon landing as well as finding out about what it is like to be an astronaut. We will also be designing and creating our own space sculptures.

Choose at least one activity from the home learning projects below (or be creative and think of your own):

- Explore different objects in your house. What materials are they made out of? Create a poster to show what you have found.
- Design and create your own space rocket! You could use recycled materials such as a plastic bottle or an old toilet roll.
- Create a miniature space scene. Use an old shoe box to show the first men on the moon.
- Design your own alien. What colour would it be? How many eyes would it have?
