

Year 1 Home Learning Project

Every **Friday**, your child will be given one piece of English home learning, one piece of maths home learning and an individual reading book to be brought back to school when they have finished reading it or the following **Wednesday**.

Children that hand home learning in on time will be rewarded with stickers!

As well as this, each term your child will be given a project based on our class topic. This can be completed in your child's own time and shared with the class when brought into school!

Our topic this term is 'Flying High'

Choose at least one activity from the home learning projects below. You can choose how you would like to present it.

- Design your own flying machine. How would it work? What would it look like? Where would it go?
- Build your own flying machine. You could use cardboard, toilet rolls, card, paper to make your own aeroplane, helicopter or space rocket. Could you find a way to make it fly?
- Build your own lighthouse for the lighthouse keeper.
- Imagine you were going to the seaside. Pack a shoebox suitcase of all the things you would need to take with you.
- Find out about a place someone you know has lived which is different to where we live. Find out about what it is like, what type of food they typically eat there and customs they have.
- Think about a place you have been that is different from where you live. Write a postcard about what it was like, what you did and what you enjoyed.
