

# YEAR 2 TERM 6 NEWSLETTER

This term our topic is **The Lion King**

## English:

For poetry we are learning about Kennings Poems. In reading and writing we are finishing off James and the Giant Peach before moving onto looking at the Lion King. We will be using clips from the movie to help us discuss character motivations and dilemmas.

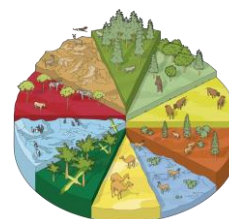

## Maths:

This term we will continue learning about shapes and shape properties of 3D shapes. We will also be measuring the length and weight of objects, learning about fractions, revising money and consolidating the many things we have learnt this year to prepare us for Year 3.

## Science:

We are learning about natural habitats and the creatures we might find living in those habitats. We'll look at the habitat around us at school and we'll learn about other habitats such as forests and desert animals.

## Geography:

We are learning about a village in Zambia called Mugarameno village. We will be learning about what people like to eat there, how they get water, what animals live near the village and the kinds of houses they live in. We'll make comparisons to the way we live here in London.

## History:

We are learning about the British nursing pioneers Florence Nightingale and Mary Seacole. We will learn about how they changed nursing forever as well as their struggles for recognition and equality.

## RE:

We are learning about lots of stories from religions all around the world such as Rama and Sita.

Yours Sincerely,

Year 2
