

Year 3

Home learning project- 'Travelling Circus'

This term we are 'Travelling Circus' through Geography (Circuses around the World), Science (Working Scientifically), DT (Cooking) and Literacy (Leon and the Place Between). We would like you to use this as inspiration for your own Home Learning project. Please bring home learning back by Wednesday 12th December however home learning projects are welcome at any point throughout the term.

Here are some ideas to inspire your creations:

- Design an outfit for a circus performer e.g. a clown
- Plan, carry out and record a fun science experiment (you could even take pictures to show the class)
- Research and create a fact file about a famous circus e.g. Cirque du soleil, Moscow Circus
- Research, plan and perform a magic trick
- Design and make a prop to be used in a circus e.g. juggling baton, trapeze
- Make a healthy savoury dish using seasonable foods
- Create a model of a 'Big Top' tent
- Imagine you are a circus performer and write about your adventures
- Design a poster to advertise your own circus

Well done for your amazing 'Sea through the Ages' projects which have been displayed outside the classrooms! We look forward to seeing your wonderful creations this term!
