

Year 3

# Home Learning Project

## 'A Force to be Reckoned With'

Due: 27<sup>th</sup> March

This term our topic is 'A Force to be Reckoned With'. We will be learning about forces and magnets in Science, Hindu Gods and beliefs in RE and reading the Iron Man in English. We would like you to use this as inspiration for your own Home Learning project. Please bring home learning back by Wednesday 27th March so that we can share what we have created with the rest of the class!

However home learning projects are welcome at any point throughout the term. Please keep an eye open for the Science and DT home learning linking to recycling.

Here are some ideas to inspire you:

- Design and make your own game to share with the class.
- Make a figure or body part of the Iron Man (giant metal man).
- Research a type of force (friction, gravity) and write a fact file.
- Find magnetic and non-magnetic items in your house and make a poster showing these two groups.
- Draw and write facts about a Hindu God or Goddess (e.g. Shiva, Krishna or Vishnu).
