

## Year 5 Home Learning - Term 5

Every Friday, children will be given one piece of literacy Home Learning and one piece of numeracy Home Learning to be completed by the following Wednesday.

Children who hand their Home Learning in on time will be rewarded with stickers!

As well as this, each term children will be given a project based on their class topic. This can be completed in the children's own time over the next few weeks.

### Home Learning Project

**Our topic this term is called 'Living Things And Their Habitats'.**

**Choose at least one activity from the home learning projects below. You can choose how you would like to present it. Bring your finished project to school by Friday 17<sup>h</sup> May, so we can share them with the whole class.**

- Research a habitat that particularly interests you (**Rainforest, Arctic, Desert or grassland**). You could try to find the answer to a question you have. Can you write a report about it or create a presentation to share with the class?
- Create an image-based poem on habitats.
  - Design and create a 3D model of a habitat for a living thing of your choice.
    - Design a T-shirt to show the life-cycle of a living thing.
    - Write a diary entry about a visit to one of the habitats below.
  - Create a fun fact page on habitats. You could include a crossword puzzle, riddle etc.
- Produce a piece of art on an animal, its habitat or both. You could use collage, paint, or just pencil.

**Good luck with your projects – we look forward to seeing everyone's home learning!**
