

Geography Tuesday 02/06/20

WALT explore our local area.

Why do we go for walks?

Walking is good for:

- getting to places
- getting fresh air
- keeping active
- keeping a healthy mind
- seeing people (in a socially distant way)

Walking is also a great way to explore our local area to see what is there.

Can you spot all of these things while on your walk today?

- post box
- newsagent
- place of worship (church, mosque, gurdwara, temple)
- bus stop
- stream, river, pond or puddle
- flowers

Write a list of the things above and tick them off if you see them on your walk.

What else did you see? Can you add them to your list?
