**WALT evaluate existing pencil pot designs.**

Last week we read 'Somebody Swallowed Stanley' by Sarah Roberts. Watch this video of the story here and think about the questions below:

[https://www.youtube.com/watch?v=LXxKz\\_IN3JO](https://www.youtube.com/watch?v=LXxKz_IN3JO)

- What is Stanley?
- Why do the animals keep swallowing Stanley?
- How do you think Stanley got in the ocean?
- What does the boy do with Stanley at the end of the story?

We learned that it is important to reduce, recycle and reuse plastic bags to help to prevent them from damaging our environment.

Have a look at these pencils pots that you can buy from a shop.

Draw a picture of **one** of them in your purple book.

Write next to your picture to say what is good about the pencil pot and what could be better.

<b>Good</b>
● strong material to carry pencils

<b>Could be better</b>
● made from plastic

Think about:

What material is it made from?

Is it strong and tall enough to hold pencils?

Has the material been recycled or reused?

Would children like it?
