WALT design our own pencil pot.

Watch the video of the story of 'Somebody Swallowed Stanley' by Sarah Roberts again.

Remember it is important that we reduce, recycle and reuse.

Many existing **pencil pots** are made out of plastic and cannot be recycled. They are not always very interesting to look at either!

Can you design your own **pencil pot** out of something that you have already used and could be recycled?

Think about:

- What could you make it from?
- How could you make it stronger?
- How could you decorate it?

You could use an empty milk bottle or a used toilet roll.

You could make it stronger by covering it with paper mache.

You could paint it or stick things on it.

➔ Draw a picture of your design and colour it.

Label your design to show what you will use, how you will make it stronger and how you will decorate it.
