WALT Discuss our observations about how the weather changes over time.

Watch this BBC Bitesize video about the seasons and have a go at the quiz too:

<https://www.bbc.co.uk/bitesize/topics/zkvv4wx/articles/zcx3gk7>

Over the last two weeks you have been keeping a weather diary.

Monday 23rd March 2020

What we have to do today is to look back at our weather diaries:

How often was it sunny?

How often was it chilly?

How many days was it cloudy?

How often did it rain?

How has the weather changed since winter?

In your purple books write sentences to explain how the weather has changed since winter.

eg:

In winter it is dark and cloudy but in spring there are more sunny days.

You are expected to write a few sentences describing what the sky looks like; how windy it may be; the temperature; if the weather is windy, or wet or freezing.

Don't forget to use Fred Talk, finger spaces, full stops and capital letters.
