

Step 2: Look at the tens first like you did before. But there is more than one with the same tens (like 34 and 36) you then look at the ones.

Therefore even though 34 and 36 have the same number of tens, 36 is the largest one of the two because it has 6 ones, whereas 34 has 4 ones.

Step 3: Write the number out from the smallest to the largest like this:

<b>21</b>	<b>34</b>	<b>36</b>
Smallest		largest

Put these sets of numbers in the correct order starting from the smallest to the largest. Don't forget to draw the Part Part Whole model for each as shown above.

- |    |    |    |    |
|----|----|----|----|
| A. | 23 | 19 | 56 |
| B. | 36 | 45 | 22 |
| C. | 65 | 63 | 66 |
| D. | 61 | 16 | 11 |
| E. | 23 | 32 | 2  |

Challenge:

36    63    45    44    12    63
