

**04.05.20**

**WALT add 100s**

Success Criteria	Pupil
I can add numbers mentally, including: a three-digit number and ones, a three-digit number and tens, a three-digit number and hundreds.	😊 😐 😞

Hello everyone!

Hope you are all well and have had a lovely weekend!

*Please remember that each day you should be starting off your maths lessons with your daily rockstar practise to improve your times tables and then you can start your maths lessons!*

Today, you will want to use some of the different ways we have learnt in class. You could use Base 10 equipment, number lines, place value counters or part whole models. Choose whichever method works best for you!

Example:

**Question:**  $300 + 200$

Method 1 - number line

Start on 300 and count on 200

$$300 + 200 = 500$$

## Method 2 - Part whole models

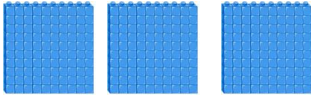

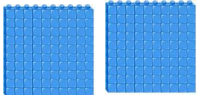

You can use your number bonds to you.

I know  $3 + 2$  is  $5$  so there are  $5$  hundreds!

$$300 + 200 = 500$$

## Method 3 - Place value grid and Base 10 or Place Value counters

Hundreds	Tens	Ones
		
		
5	0	0

3 hundreds + 2 hundreds = 5 hundreds

$$300 + 200 = 500$$

Your turn!

Choose the method that works best for you to add the following 100s

1.  $300 + 600$
2.  $600 + 200$
3.  $100 + 500$
4.  $200 + 800$
5.  $200 + 200$
6.  $100 + 600$
7.  $700 + 200$
8.  $300 + 700$
9.  $900 + 100$
10.  $400 + 400$

Complete the additions below:

11.

12.

13.

14.

15.

## Answers

1.  $300 + 600 = 900$
2.  $600 + 200 = 800$
3.  $100 + 500 = 600$
4.  $200 + 800 = 1000$
5.  $200 + 200 = 400$
6.  $100 + 600 = 700$
7.  $700 + 200 = 900$
8.  $300 + 700 = 1000$
9.  $900 + 100 = 1000$
10.  $400 + 400 = 800$
11. 600
12. 600
13. 500
14. 500
15. 800
