

22.05.20

WALT practise our mental arithmetic skills (addition and subtraction)

Don't forget to start the lesson with your daily Times Tables Rockstars session!

Today you are going to have a go at some Year 3 arithmetic questions.

The questions I've left for you are testing your addition and subtraction skills. They include adding and taking away 10 and 100 and also adding and subtracting 1s and 10s from 3 digit numbers. You may be able to do them in your head. If not, why not draw out a place value grid and base 10 equipment or a number line?

If you click on the link you can access the test and you will find the answer to see how you have got on!

Good luck and just do your best! For some of the questions you may need to exchange.

<https://sinacio.exampro.net/>

The logo consists of the words 'just do your BEST.' written in a black, handwritten-style font. The word 'BEST.' is written in a larger, bolder font than the other words.

Next week is half term (hasn't the term gone quickly?!) so I'd like you all to rest, relax and stay safe! There will be no maths lessons for you - you have a week off! Phew!

Have a fantastic week and take care!
