WALT count in 50s

Success Criteria	Pupil
I can count from 0 in multiples of 50	😊 😐 😞
I can solve number problems and practical problems involving these ideas.	

Lets count in 10s:

10 20 30 40 50 = 50

If I take another 50 I make 100 in total:

60 70 80 90 100 = 100

I now have 100 in total!

We could have saved some time by counting in 50s instead of 10s!

Eg. 50, 100, 150, 200, 250, 300, 350

If you look - you can see a pattern! Our 5 x tables help us when we are counting in 50s!

Let's try counting in 50s

Example

Fill in the missing numbers (remember to use your 5 x tables knowledge to help you)

0		100	150		250		350
---	--	-----	-----	--	-----	--	-----

0	50	100	150	200	250	300	350
---	----	-----	-----	-----	-----	-----	-----

1.

250	300		400		500	550	
-----	-----	--	-----	--	-----	-----	--

2.

600		700	750		850	
-----	--	-----	-----	--	-----	--

3.

400	450		550		650		
-----	-----	--	-----	--	-----	--	--

4.

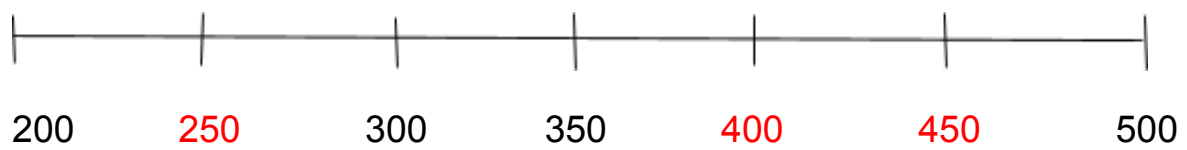

350		450		550		650	
-----	--	-----	--	-----	--	-----	--

5.

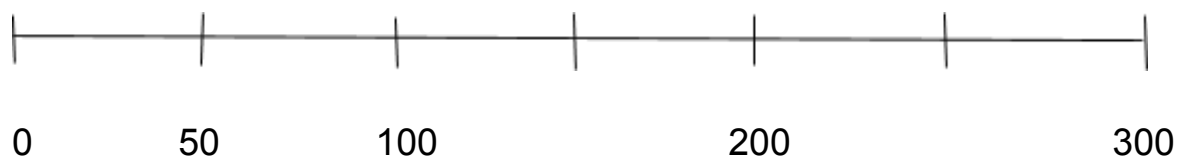

150		250	300				
-----	--	-----	-----	--	--	--	--

See if you can fill in the blanks on a number line by counting up in 50s
