

Tuesday 2<sup>nd</sup> June 2020 - Spelling

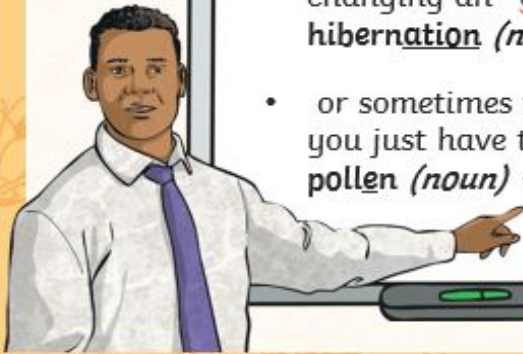

This week, we are starting to look at how nouns and adjective root words can be changed into verbs using suffixes.

We are going to start by concentrating on using the suffix -ate.

## -ate suffix words can be created by:

- simply adding the -ate suffix to a noun or adjective root word, e.g.  
**carbon** (*noun*) → **carbonate** (*verb*);
- removing the 'e' from the end of noun or adjective root word before adding -ate, e.g.  
**vaccine** (*noun*) → **vaccinate** (*verb*);
- changing an -ation noun to an -ate verb, e.g.  
**hibernation** (*noun*) → **hibernate** (*verb*);
- or sometimes the root word itself changes and you just have to learn that particular spelling, e.g.  
**pollen** (*noun*) → **pollinate** (*verb*).

### TASK -

Now - after reading these rules can you write out the words that have been spelt correctly?

Challenge - write 3 sentences using these words.
