

Today is

Look at the
number line,
what do you
notice?

FRIDAY

The focus today is 'odd' and 'even'

My 0 to 20 Number Line - Odd and Evens

What can you tell
us about the
numbers in red?

Odd or Even

What can you tell
us about the
numbers in blue?

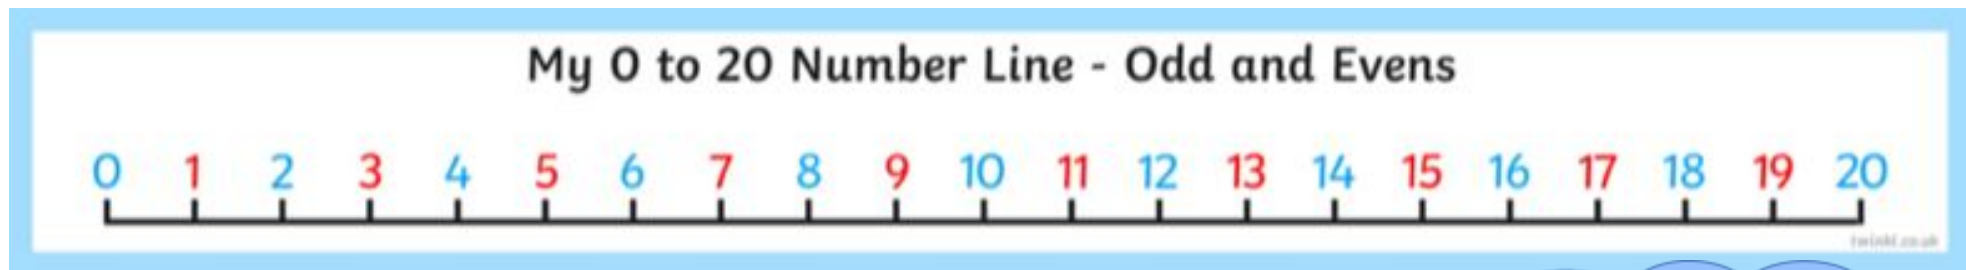

Warm up!

Is your name odd or even?

Write your name in your book, then count each letter and let me if your name is odd or even.

e.g. M i s s H i l l

1 2 3 4 5 6 7 8 My name is even, 8 is an even number.

Did you notice that the numbers in red are all odd numbers?

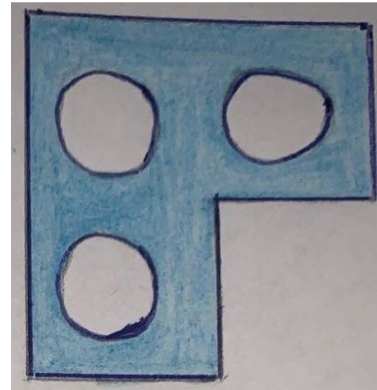

Did you notice that all the blue numbers are even?

PROBLEM SOLVING

Here are some suspicious numbers, you need to investigate which number is odd and which is even. You must record your investigation with drawings or a written explanation.

e.g.

3 is odd because it a hole without a friend

Try this ninja slicing game:

Challenge: Let's explore sharing these 12 fish between these 2 hungry bears.

Will both bears get the same amount of fish?
Are there any fish leftover?
How many will each bear get?

What if there were different groups of bears!
Investigate the different size groups the fish could share between, where all the bears get the same amount of fish.
